

WCP Outdoor Call Point Range

NO/NC Contact Model (Colour Versions)

> Product Benefits

- Sealed to IP67
- Unique 'Plug & Play' installation concept
- Total 'Flex-Ability' in the choice of operating element
- Anti-Tamper facility
- Enhanced aesthetics and compact design

Product Overview

Installation efficiency, flexibility and full compliance with the latest standards are at the heart of the new WCP outdoor call point range.

The outdoor WCP is an IP67 sealed manual call point product. The enhanced environmental protection allows the unit to be installed in many external environments where water and dirt are likely to be present, making it a true waterproof and outdoor product.

Installation time and ultimately cost, are of paramount importance to any fire or security installer. The WCP range directly reflects this need by providing a unique 'plug and play' concept designed specifically to reduce installation time. All new WCP products utilise a special terminal block, where all initial installation cabling is terminated. This terminal block is then simply connected to the back of the WCP. Simple, but effective with no re-termination required and no time wasted. In addition, all WCP products are supplied with three standard 20mm knock outs for cable entries, accommodating for all types of surface wiring installations.

Both break glass and re-settable operating elements can now be used within a manual call point. To provide you with the greatest 'flex-ability', the new WCP range can be configured as either a break glass or re-settable unit by simply changing from one element to another. No other additional parts or alternative products need to be ordered.

All WCP outdoor call point products also help preserve the integrity of the overall system as illegal removal of the product lid will result in the call point operating and the system going into alarm.

The WCP3A product version is supplied with one normally open and one normally closed contact. Selecting either the "Normally Open" or "Normally Closed" contact is easily achieved by simply connecting the terminal block to the required connection in the back of the WCP3 product. Single pole changeover switching can be achieved with the use of two terminal blocks.

Electrical Specification

Connection Details: See Figure .1
 Cable Termination: 0.5-2.5mm²
 Maximum Voltage: 30VDC
 Switch Rating: 2 Amps

Figure.1

Environmental Specification

Humidity: 0-95% non-condensing
 Operating Temperature: -30°C to +70°C
 Storage Temperature: -30°C to +70°C
 Ingress Protection (IP) Rating: IP67

Mechanical Specification

Material: PC/ABS
 Weight: 240g
 Colours: Green,
 White,
 Yellow,
 Blue.
